

## **Edge-R-CSY**

Edge-R is the ideal Internal Security undercover agent. He is so unassuming and bumblingly naive that no one would suspect him of duplicity. In order to enhance this image, his superiors had a cybernetic third eye implanted in his forehead. The eye is blue and slightly larger than his real eyes. It tracks along with the other eyes and blinks at regular intervals. The eye has no other function.

Mutant Power: None. Although he is not a mutant, Edge-R is registered as a "mind reader", under the pretense that traitors would be more likely to be drawn to such a person and would be more open around him.

Service Group: Internal Security. His cover also includes him belonging to the R&D service group, because everyone in IntSec knows that R&D is just rife with traitorous activity.

Secret Society: Edge-R is a plant in the Wobblies. The Wobblies are a socialist labor organization. Edge-R participates in the treasonous activities of the Wobblies (along with other IntSec agents) in the belief that exposing the Wobblies will lead them closer to the leadership of the Commies.

Skills & Abilities: Edge-R is not particularly spectacular in any one area or ability. He is fairly good at sucking up and bluffing his way through rough spots. He has some training in computer data searches as well as standard IntSec training in laser pistols, hand-to-hand combat, and investigation. Through his investigations, he has also picked up some knowledge of the Outside and old world cultures.

Equipment:

Standard issue RED uniform (with yellow "mutant stripe")

Laser pistol

2 RED laser barrels

Notebook

Pen

Comm Unit I

Several tracts of Wobblie literature
